

Tristan Setha

Full Stack Engineer with over two years of experience building and maintaining web applications in fast paced environments.

WORK EXPERIENCE

Front End Software Developer

January 2022 – October 2023

Digital Arts & Sciences, Remote

- Developed an average of 15 ad sets per week using HTML, Sass, JavaScript, Node.js and Greensock.
- Developed and proposed automation solutions for internal tools reducing development time by 15 to 20 minutes per ad set.
- Developed TDECU dealership locator tool that located nearby dealers based on the user's current location using Google Maps API.
- Updated Trupanion certification website to an interactive svg interface ensuring cross-browser functionality.
- Updated GoDaddy Style Guides website with new design and content.
- Updated documentation to improve developer onboarding.
- Conducted thorough debugging and troubleshooting of internal tools to ensure seamless ad development process.
- Updated various client websites ensuring adherence to Web Content Accessibility Guidelines.

Associate Software Developer

October 2019 – August 2020

Infosys, Redmond, WA

- Developed an updated stock chart application using IEX Cloud, Angular, TypeScript, NgRx, Hapi.js, Docker and Redis.
- Trained in Java full stack development.

Software Engineer | Intern

June 2019 – September 2019

iLink Digital, Bothell, WA

- Developed an internal web application for employee events using Node.js, React.js, Material UI, Express, SQL, and Azure Cosmos DB.
- Collaborated with cross-functional teams including developers, designers, and Human Resources.

Quality Assurance Analyst

August 2018 – January 2019

Mighty Ai, Seattle, WA

- Labeled and annotated large-scale image training data-sets to help train autonomous vehicles.
- Interacted with spare5 community to resolve complaints, answer questions and reimburse users.
- Collaborated with various teams to detect user labeling edge cases to help scale object detection from 67% accuracy to 93-97% in 7+ projects.
